

About ResEdit™ Extensions

This folder contains two resource editors you can add to ResEdit 2.1 or later. The documentation files accompanying each editor explain what the editor does and how to add it to ResEdit.

WARNING

Do not add the editors in this folder to versions of ResEdit before 2.1.

DISCLAIMER

These editors are not part of the official ResEdit release, and have not been rigorously tested. Use caution when using any version of ResEdit to which you have added these editors.

NOTE TO LICENSEES OF RESEDIT EXTENSIONS

To minimize confusion about what capabilities are included in official ResEdit releases, please do not distribute copies of ResEdit containing these extensions. Let end users customize their copies of ResEdit, so they can make the decision whether to incorporate these features. Make sure each editor extension file is accompanied by its electronic documentation so users can understand the purpose of the editor and how to install it.
